

SOURCING QUALITY,
DELIVERING PEACE

The image shows a modern bathroom with light beige marble walls and floor. A large, rectangular mirror is mounted on the wall, featuring the 'Aurastone RESOURCES' logo in blue. Below the mirror is a double vanity with two white rectangular sinks and a wooden cabinet. The vanity is flanked by two sets of wall-mounted faucets. To the left, a white toilet is partially visible next to a wooden bench with folded white towels. To the right, a glass shower enclosure is visible with a wooden shelf and more towels. The ceiling has a recessed square light fixture.

Aurastone Group is an Indian Sourcing, Processing and Distribution Company with Capability of supplying innovative and luxurious building materials based on the customer's requirements. At present we cater to both residential and commercial construction projects in India and the Middle East.

We are known for identifying the best products and we are supported by experienced consultants who render their expertise in sourcing materials as per our customer's needs, which not only helps us in dealing with (will help us in sourcing the materials from) the right companies. It also helps us to develop effective operating procedures in sourcing.

We have tie-ups with various manufacturers who follows, stringent manufacturing norms required for exports and we have a team of experts who does the third-party audit to ensure that we source the best products.

Associating with us will help you in reducing the burden of scouting the materials, the time involved in procurement and quality check which will enable you to source the best materials, ensure prompt supply that helps you to complete your projects in time.

VISION

Our Vision is to be benchmarked for quality sourcing and be the preferred brand amongst the Construction industry globally by 2025

MISSION

Our Mission: is to source best construction and allied materials using experts who are both quality and environment conscious supported by a team of dedicated staff who will be constantly trained and provide with apt infrastructure

VALUES

OUR VALUES ARE

- A** - Align our services in line with customers needs
- U** - Understand the needs of both internal and external customer to serve them better
- R** - Review our performance regularly to improve our services
- A** - Act Assertively during challenging situation
- S** - Seek and share knowledge
- T** - Train ourselves regularly to be updated
- O** - Own the problem
- N** - Nimble in action
- E** - Empathise to ensure we care

NATURAL STONES

Sandstone is composed of quartz or feldspar (both silicates) because they are the most resistant minerals to weathering processes at the Earth's surface, as seen in the Goldich dissolution series. Like uncemented sand, sandstone may be any color due to impurities within the minerals, but the most common colors are tan, brown, yellow, red, grey, pink, white, and black. Since sandstone beds often form highly visible cliffs and other topographic features, certain colors of sandstone have been strongly identified with certain regions.

Rock formations that are primarily composed of sandstone usually allow the percolation of water and other fluids and are porous enough to store large quantities, making them valuable aquifers and petroleum reservoirs.]

Quartz-bearing sandstone can be changed into quartzite through metamorphism, usually related to tectonic compression within organic belts.

Specifications

SLABS	: 200 x 60 CM+ (18 / 20 / 30 MM Thick)
TILES	: 30x30, 40x40, 50x50, 30x60, 40x60, 60x60 60x90, 90x90 CM & Cut To Size. (18 / 20 / 30 MM Thick)
