

SOURCING QUALITY,
DELIVERING PEACE

The image shows a modern bathroom with light beige marble walls and a matching floor. A large, rectangular mirror is mounted on the wall, featuring the 'Aurastone RESOURCES' logo in blue. Below the mirror is a double vanity with two white rectangular sinks and a wooden cabinet. The vanity is flanked by two sets of faucets. To the left, a toilet is partially visible next to a wooden bench with folded white towels. To the right, a glass shower enclosure is visible with a wooden shelf and more towels. The ceiling has a recessed square light fixture.

-

Aurastone Group is an Indian Sourcing, Processing and Distribution Company with Capability of supplying innovative and luxurious building materials based on the customer's requirements. At present we cater to both residential and commercial construction projects in India and the Middle East.

We are known for identifying the best products and we are supported by experienced consultants who render their expertise in sourcing materials as per our customer's needs, which not only helps us in dealing with (will help us in sourcing the materials from) the right companies. It also helps us to develop effective operating procedures in sourcing.

We have tie-ups with various manufacturers who follows, stringent manufacturing norms required for exports and we have a team of experts who does the third-party audit to ensure that we source the best products.

Associating with us will help you in reducing the burden of scouting the materials, the time involved in procurement and quality check which will enable you to source the best materials, ensure prompt supply that helps you to complete your projects in time.

VISION

Our Vision is to be benchmarked for quality sourcing and be the preferred brand amongst the Construction industry globally by 2025

MISSION

Our Mission: is to source best construction and allied materials using experts who are both quality and environment conscious supported by a team of dedicated staff who will be constantly trained and provide with apt infrastructure

VALUES

- R** - Review our performance regularly to improve our services
- A** - Act Assertively during challenging situation
- S** - Seek and share knowledge
- T** - Train ourselves regularly to be updated
- O** - Own the problem
- N** - Nimble in action
- E** - Empathise to ensure we care

CLADDING STONES

Stone cladding is a Stone veneer, or simulated stone, applied to a building or other structure made of a material other than stone. Stone cladding is sometimes applied to concrete and steel buildings as part of their original architectural design. Natural stone cladding can be installed on the wall either by using a wet method or dry method. In wet methods mortar mix or cement or adhesives are used. In the dry method, the stones are installed mechanically to the wall either by drilling and bolting or by arranging the stones on a metal frame system
